

TECH460 Final Project:

Your Project Title Here

Your name

Session

Date

Fill in your project title, your name, the session (e.g. March 2021), and the date where indicated.

(Delete this instruction box before submitting your assignment.)

Introduction

Provide an overall introduction that describes the project as a whole and outlines its major sections.

(Delete this instruction box before submitting your assignment.)

Executive Summary

Provide a brief overview that describes the problem you are attempting to solve or process you are attempting to enhance, and presents the overall solution without specific details.

(Delete this instruction box before submitting your assignment.)

Organization Profile and Problem Statement

After this section heading slide, insert the slides from your Module 2 project deliverable (not including the title slide and rubric). Make any corrections or additions based on feedback from your teammates and professor.

(Delete this instruction box before submitting your assignment.)

Technology Selection and Design

After this section heading slide, insert the slides from your Module 4 project deliverable (not including the title slide, rubric and problem statement). Make any corrections or additions based on feedback from your teammates and professor.

(Delete this instruction box before submitting your assignment.)

Implementation Plan

After this section heading slide, insert the slides from your Module 6 project deliverable (not including the title slide, rubric, problem statement and recommended solution). Make any corrections or additions based on feedback from your teammates and professor.

(Delete this instruction box before submitting your assignment.)

Incorporation of Feedback

Summarize the feedback you received from teammates on each section of the project and describe how you utilized that feedback to improve your final product.

(Delete this instruction box before submitting your assignment.)

Career Readiness

Describe how completing this project has improved your readiness for your chosen career, and how you will use the completed project to further your career goals.

(Delete this instruction box before submitting your assignment.)

Conclusion

Summarize the project and any conclusion(s) reached.
